Г

DATE

PERIOD

Unit 5, Lesson 4 Practice Problems

1. The graph and the table show the high temperatures in a city over a 10-day period.

day	1	2	3	4	5	6	7	8	9	10
temperature (degrees F)	60	61	63	61	62	61	60	65	67	63

- a. What was the high temperature on Day 7?
- b. On which days was the high temperature 61 degrees?
- c. Is the high temperature a function of the day? Explain how you know.
- d. Is the day a function of the high temperature? Explain how you know.
- 2. The amount Lin's sister earns at her part-time job is proportional to the number of hours she works. She earns \$9.60 per hour.

- a. Write an equation in the form y = kx to describe this situation, where x represents the hours she works and y represents the dollars she earns.
- b. Is *y* a function of *x*? Explain how you know.

NAME

- c. Write an equation describing *x* as a function of *y*.
- 3. Use the equation 2m + 4s = 16 to complete the table, then graph the line using s as the dependent variable.

4. Solve the system of equations:
$$\begin{cases} y = 7x + 10 \\ y = -4x - 23 \end{cases}$$
